WELCOME NOTE

Following the success of the first and second editions of the Modern Finance Conference, we are pleased to welcome researchers, academics, and finance practitioners to the 3rd Modern Finance Conference in Kraków, Poland, organized by the Modern Finance Institute in collaboration with the Krakow University of Economics. The conference provides a platform for disseminating cutting-edge research, exchanging innovative ideas, and discussing novel approaches and current issues across all areas of finance.

We are honoured to welcome our distinguished keynote speakers, Professor Marcin Kacperczyk from Imperial College Business School (UK) and Professor Douglas Cumming from the Stevens Institute of Technology School of Business (USA). Our special thanks go to the journal editors who kindly agreed to support the conference and participate in the Meet the Editors and Editors' Fast Track sessions: Professors Oskar Kowalewski (*International Review of Financial Analysis*), Sabri Boubaker (*Journal of International Financial Management & Accounting*), Ilan Alon (*International Journal of Emerging Markets*), Chun-Ping Chang (*Innovation and Green Development*), Ender Demir (*Eurasian Business Review*), and Daniel Page (*Investment Analysts Journal*). We would also like to thank the authors of the submitted papers, members of the Scientific Committee, and all participants who contribute to the conference as presenters, discussants, session chairs, and attendees.

Finally, our hats are off to all the members of our Organizing Committee, as well as to all other supporters—both from within and outside of the Krakow University of Economics—for their invaluable contributions to the preparations of this event.

We wish you all a productive and scientifically stimulating conference, as well a chance to establish networking and collaborations, meet new colleagues, and discover one of the most unique cities in the world. We sincerely hope you will enjoy your visit to Krakow!

About the Modern Finance Institute

The **Modern Finance Institute**, established in 2023, is dedicated to advancing financial research, fostering connections between academia and industry, and promoting professional growth. Its key objectives include supporting the development of financial research, promoting financial literacy, and encouraging collaboration between finance scholars and business practitioners. The Institute also emphasizes socio-economic development through various initiatives, such as organizing conferences, providing financial support for research projects, and publishing academic literature. By fostering a deep understanding of finance, the Institute aims to contribute to the socio-economic progress of Poland and beyond.

About the Krakow University of Economics

The **Krakow University of Economics** (Uniwersytet Ekonomiczny w Krakowie), founded in 1925, is the largest university of economics in Poland and the country's second-oldest institution of its kind. Today, the University educates approximately 15,000 students, while more than 100,000 graduates have passed through its doors since its establishment. Its centrally located, green campus on Rakowicka Street covers more than seven hectares and brings together almost all of the University's facilities within walking distance of Kraków's historic centre. With academic partnerships involving more than 200 universities worldwide, KUE combines a century of academic tradition with a strong international outlook. The institution has played a pivotal role in shaping Poland's modern economic landscape, providing key financial experts and policymakers to both domestic and European markets.

About Krakow : Tradition, Culture and Modern Energy

Krakow, Poland's historic royal capital and one of its oldest cities, is a place where centuries of history coexist with a dynamic academic and business environment. Situated on the Vistula River in southern Poland, the city is home to more than 800,000 residents and has long played a central role in the country's political, cultural, and intellectual life. Krakow's Historic Centre, including the medieval Old Town, Wawel Hill and the historic district of Kazimierz, was among the first sites to be inscribed on the UNESCO World Heritage List in 1978. Its remarkably preserved architectural heritage, centred around the Main Market Square, reflects the city's importance as the former seat of Polish kings and one of Central Europe's major historical centres.

Krakow offers an exceptional range of cultural and historical attractions. At its heart lies the Main Market Square (Rynek Główny), surrounded by landmarks such as St. Mary's Basilica and the Cloth Hall, while nearby Wawel Royal Castle overlooks the Vistula River and recalls Krakow's centuries as Poland's royal centre. The former Jewish district of Kazimierz is today one of the city's most distinctive neighbourhoods, combining historic synagogues and cultural heritage with restaurants, cafés and galleries. Visitors can also explore the Planty gardens surrounding the Old Town, the National Museum, and sites associated with Krakow's twentieth-century history. The city remains one of Poland's most important cultural destinations, attracting millions of visitors each year.

Beyond its historic character, Krakow is also a major academic, technological and business centre. The city is home to numerous universities and research institutions, including the centuries-old Jagiellonian University and the Krakow University of Economics, and has developed a substantial international business-services, technology and start-up ecosystem. Krakow has repeatedly received recognition for its business friendliness, human capital and innovation environment, and in 2026 was named a Top European City Ecosystem for Startups. This combination of intellectual tradition, international connectivity and modern economic development makes Krakow a particularly fitting location for the 3rd Modern Finance Conference—a city where history, scholarship and innovation meet.
